PR01 RAL 9022

PR04 RAL 9022

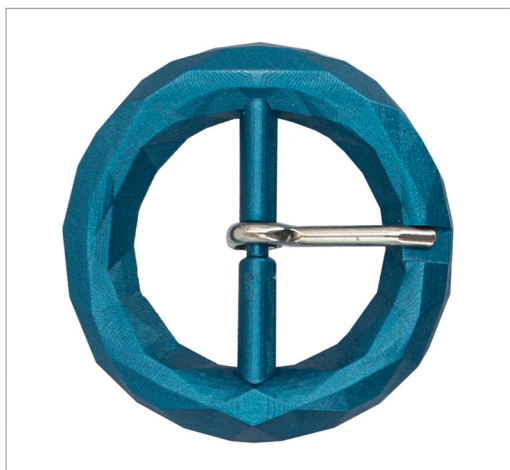

I prototipi prendono immediatamente forma con la stampante 3D, che consente di toccare con mano le proprie idee nell'arco di pochissimo tempo. A partire dall'idea e passando per il rendering, creiamo in resina prototipi di accessori personalizzati. La stampa 3D può essere inoltre utilizzata anche per piccole produzioni di accessori moda, personalizzabili nelle forme e nei colori.

Thanks to 3D printing, prototypes come to life in a heartbeat, giving our customers the possibility to hold a first, tangible shape of their ideas in a matter of days. Starting from the customer's idea, we first create a render of it and then a resin prototype of their customised accessories. 3D printing can also be used for small production batches of fashion accessories, always ensuring both shape and colour customization.
